

TRANSUBSTANTIATION LOOPS

FRIDAY 13 OCTOBER 2006, 8PM

THE PHYSICS ROOM

\$5 / MEMBERS FREE

Auckland electronic artists Sam Hamilton and Eve Gordon are set to perform **Transubstantiation Loops**, a one night only mix of multiple 16mm film projections and live sound performance accompanied by video footage by Campbell Farquhar.

Using 16mm projectors, Hamilton and Gordon will utilise organic materials, framing them through the intense light of the projector to create "living" fragile image forms while establishing a unique sense of film at the moment of its inception.

Extrapolating from raw materials, **Transubstantiation Loops** promises to be a performance of intensely animated movement and colour. This Expanded Cinema project was first developed for the TransAcoustic Festival in December 2005, which has since then grown into a well developed set of cinematic structures and techniques.
